

## VPN for MacBook Pro

VPN connection only works when accessing the network from **OUTSIDE THE DISTRICT**.

Below are the steps to help you connect your Windows 10 device to VPN (steps are similar if you are running an older operating system):

- ◆ Open web browser of choice
- ◆ Type `https://portal.conroeisd.net` in the URL address bar
- ◆ Name and Passwords are same as domain credentials
- ◆ Select "LOG IN"

**NOTE:** We strongly recommend that **Cisco AnyConnect** be **uninstalled** from your device before GlobalProtect is installed. Page 9 of this handout has steps to uninstall.

Click on "Download Mac 32/64 bit Global/Protect agent to download program file":

## GlobalProtect Portal

[Download Windows 32 bit GlobalProtect agent](#)

[Download Windows 64 bit GlobalProtect agent](#)

[Download Mac 32/64 bit GlobalProtect agent](#)

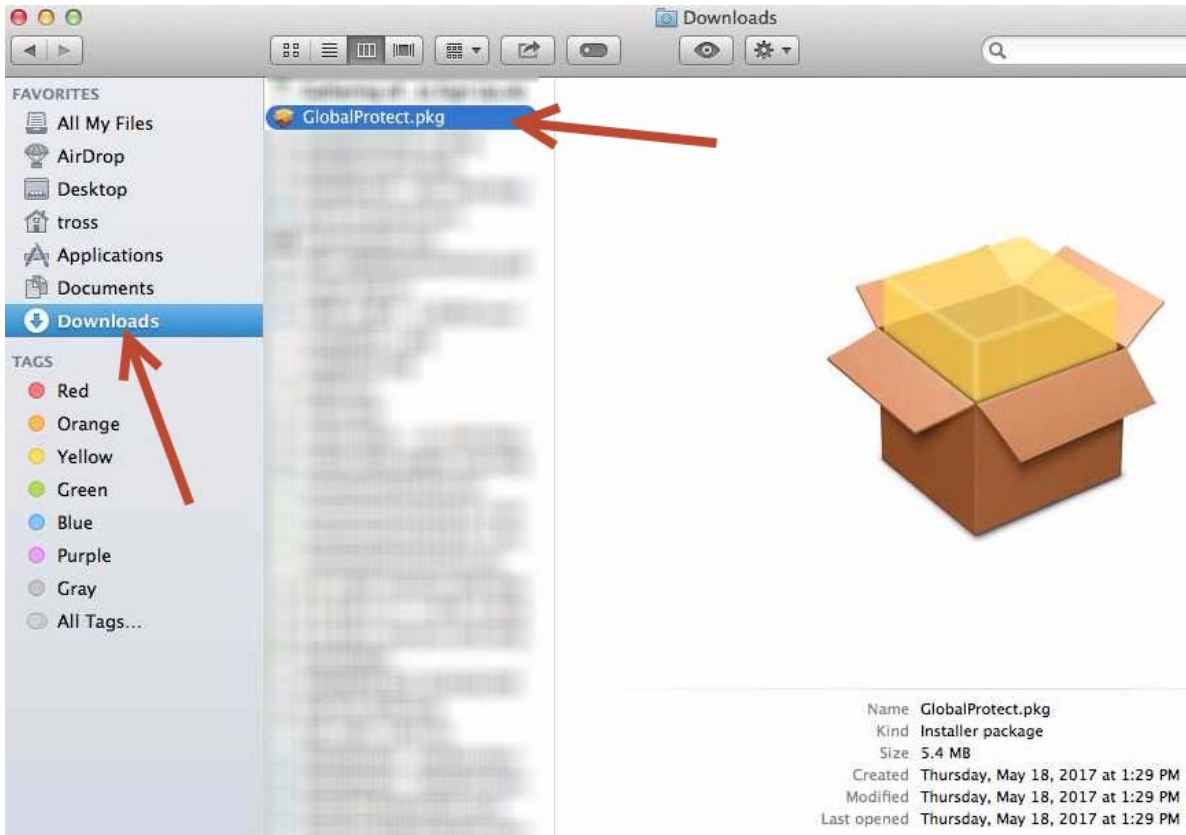

Windows 32 bit OS needs to download and install Windows 32 bit GlobalProtect agent.  
Windows 64 bit OS needs to download and install Windows 64 bit GlobalProtect agent.  
Mac OS needs to download and install Mac 32/64 bit GlobalProtect agent.

Click on "Finder"

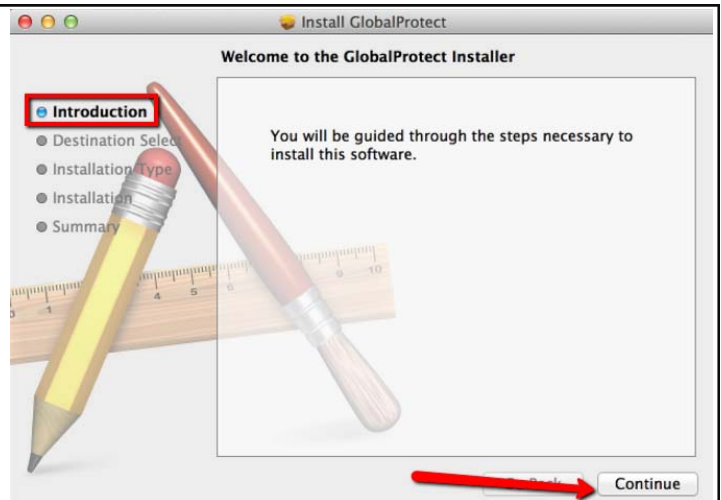

Click on "Downloads" folder

Double click on "GlobalProtect.pkg" file to begin installment of program:

Installation wizard will display Introduction screen.

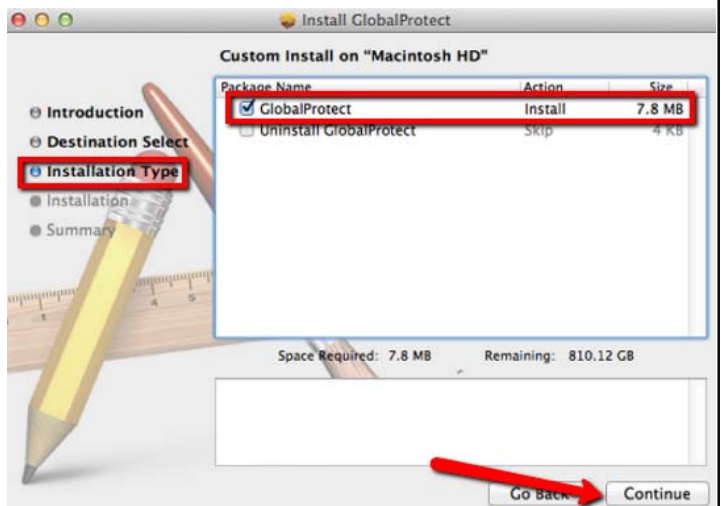

Click "Continue":

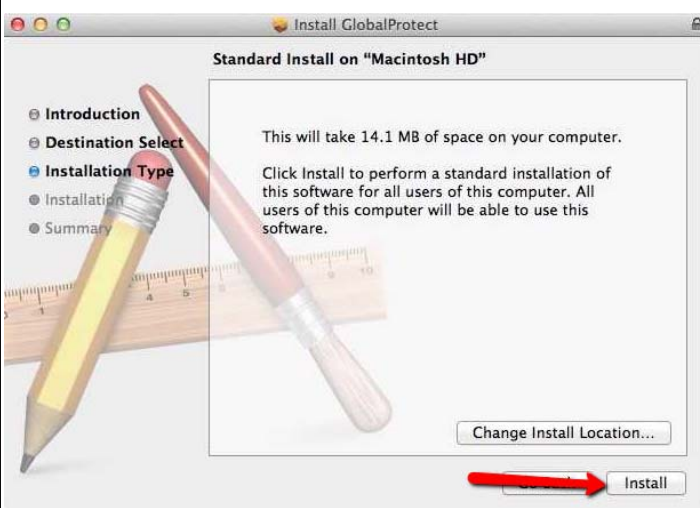

Select "Install for all users of this computer" then click "Continue":

Installation Type will display selection next to GlobalProtect, click "Continue":

Verification screen will display information  
Click on "Install":

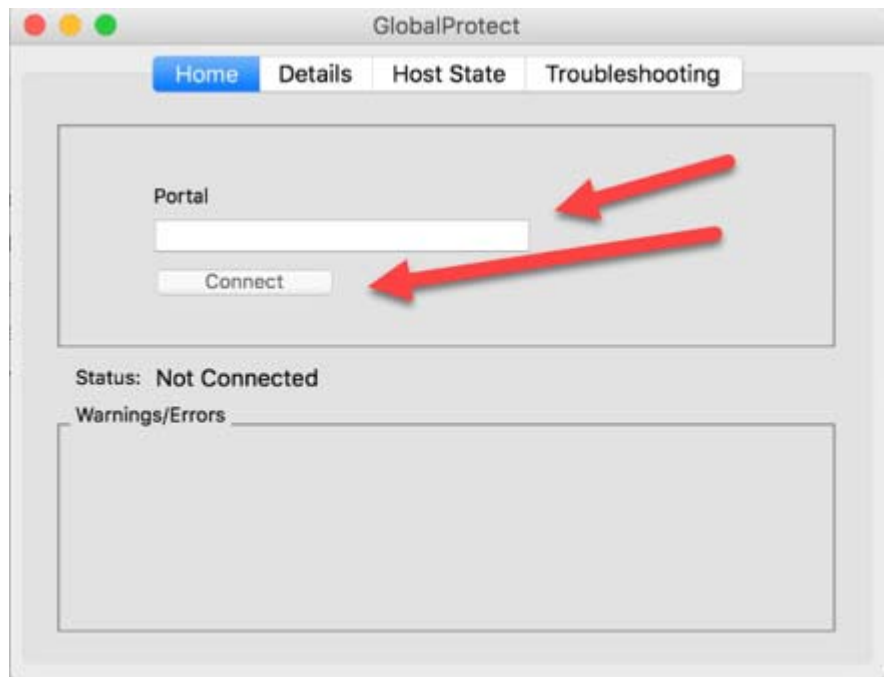

You must enter the computer User Name and Password, click "Install Software":

GlobalProtect login screen.

Portal: [portal.conroeisd.net](http://portal.conroeisd.net)

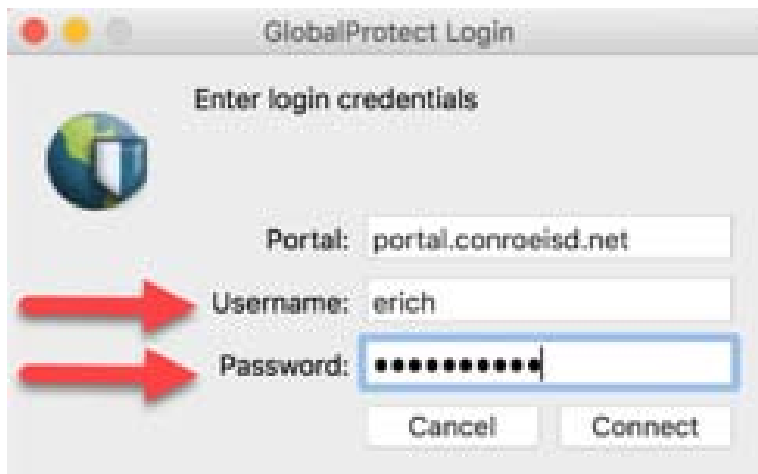

Click "Connect" after you type in the district portal:

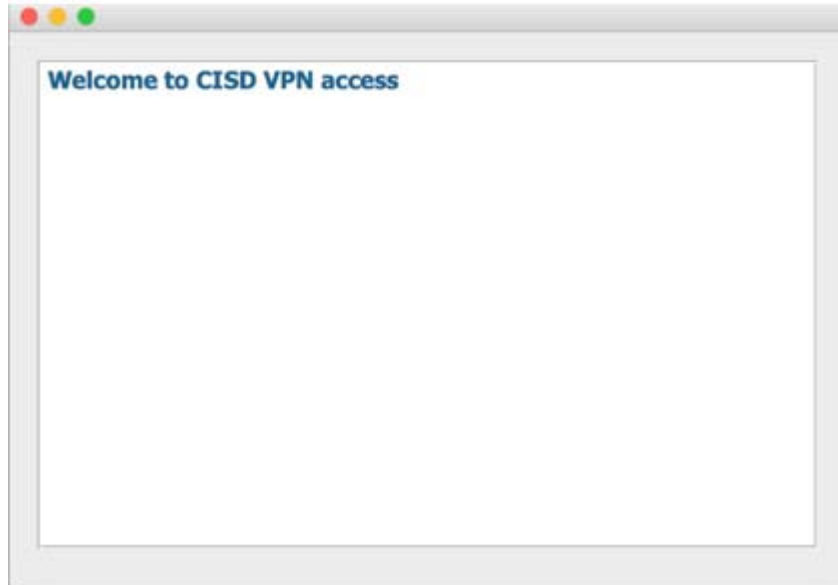

GlobalProtect Login Screen.

Username and Password are same as your domain login credentials.

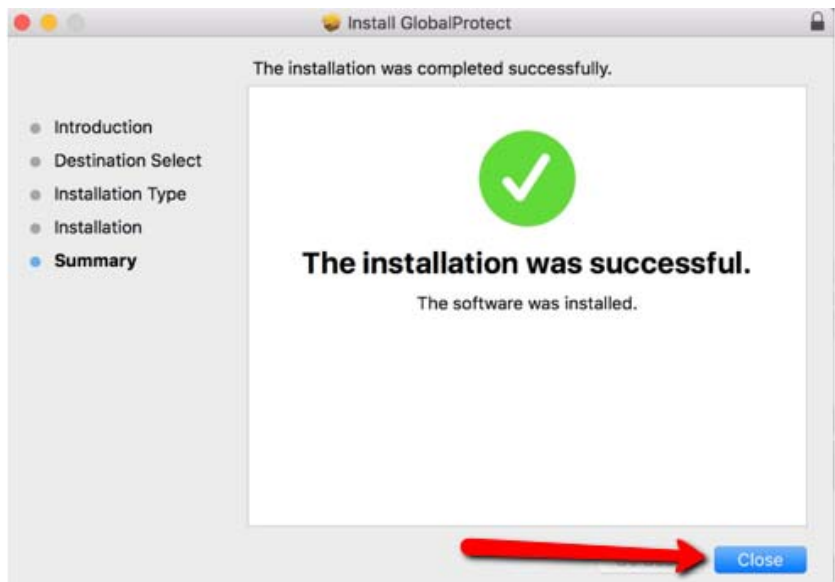

Click "Connect" :

Welcome to CISD VPN access screen will display onscreen. You can exit/close:

The installation was successful screen will display, click "Close":

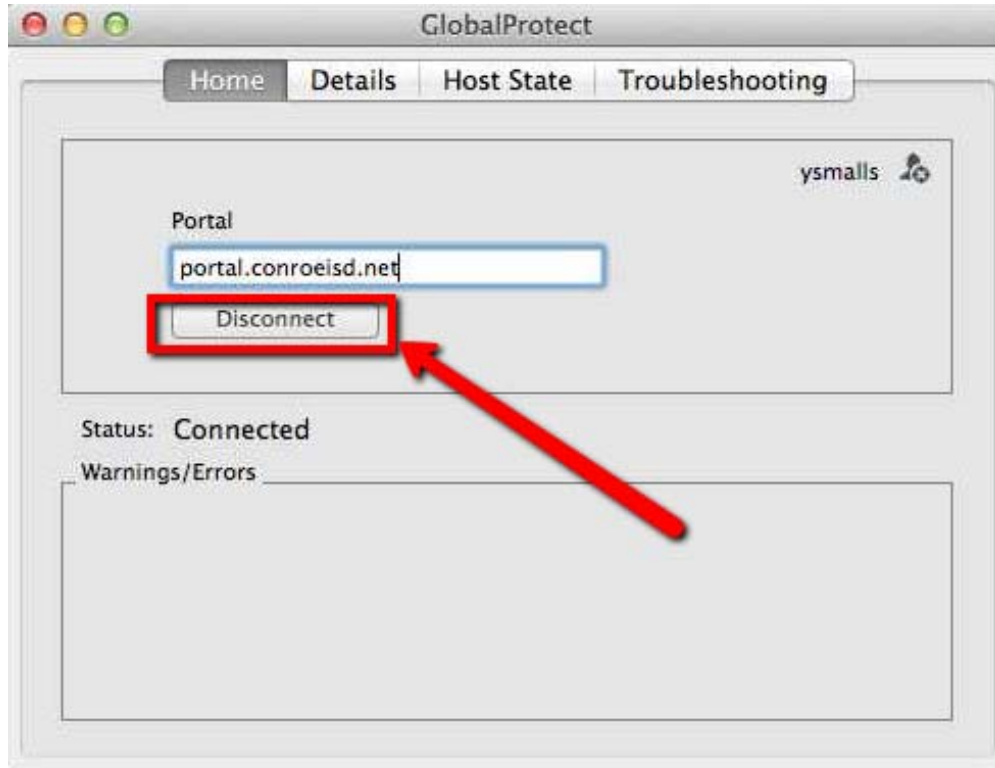

**NOTE:** Minimize or keep this screen in the background:

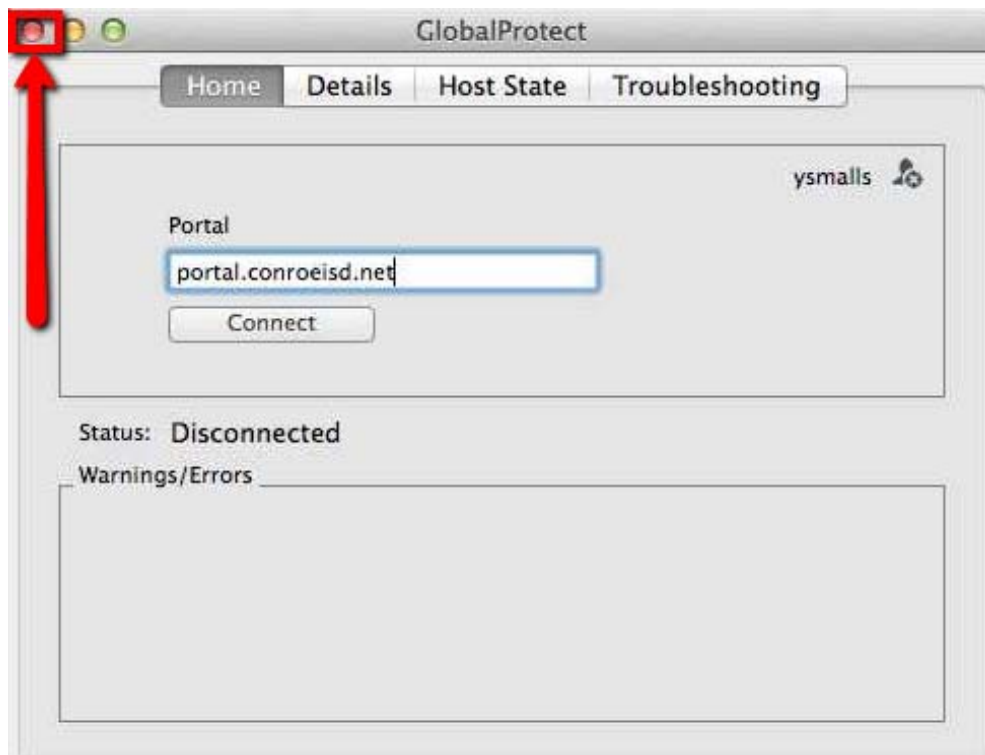

Open Safari, in URL address type **my.conroeisd.net** to access the districts intranet:

The screenshot shows a Safari browser window with the address bar containing <https://my.conroeisd.net/default.aspx>. The page header features the Conroe Independent School District logo and a "Visit District Site" link. A left sidebar contains navigation categories: "Apps" (with sub-links for Employees and Students), "News" (with sub-links for Around the District, Events, and Press Releases), and "Quick Links" (with sub-links for Employee Directory, School Directory, and Departments). The main content area has tabs for "Frequently Used" and "More". The "Frequently Used" tab is active, displaying a section titled "Employee Apps - Frequently Used". Below this title is a welcome message: "Welcome to the Conroe ISD Intranet. Click an icon below to log in. Recommended browsers are noted by the icons in the corners of select applications." There are eight application icons arranged in two rows. The top row includes: "frontline education Absence Management" (blue icon with a Chrome icon in the bottom right), "Blackboard connect" (green icon), "canvas" (orange icon with a Chrome icon in the bottom right), and "eduphoria!" (dark blue icon with a Chrome icon in the bottom right). The bottom row includes: "eFinancePLUS." (grey icon), "Employee Access" (blue icon with a red apple logo), "Employee" (green icon with a hand holding a dollar bill), and a partially visible "ep" icon (dark blue icon).

To disconnect from VPN click on **"Disconnect"** from the GlobalProtect screen you previously minimized or kept in background:

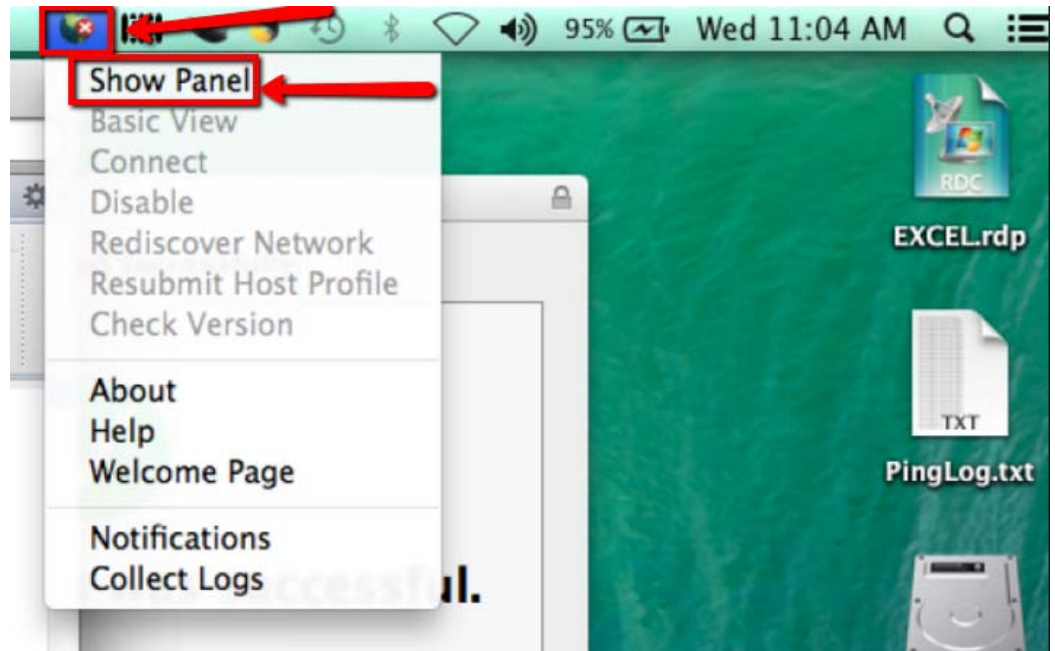

Close GlobalProtect screen after you disconnect:

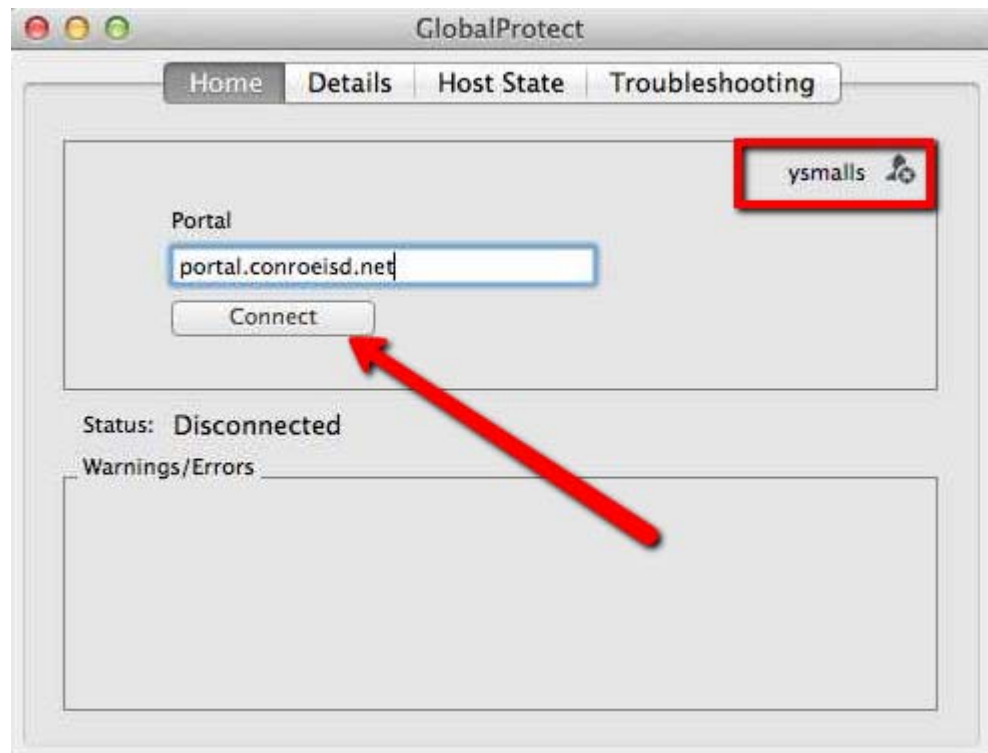

To connect to VPN with the **GlobalProtect** Client after initial installation.

Right click on the **GlobalProtect** client icon on the top right hand-side of the home screen.

Select "**Show Panel**":

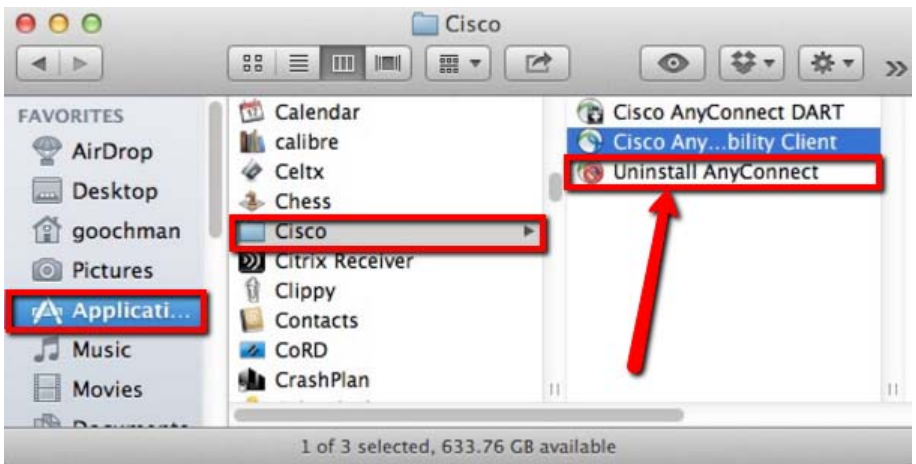

Click "**Connect**" on the **GlobalProtect** screen, you will see your login on the right hand-side:

## How to Uninstall an application on MacBook Pro OS X.

- ◆ Click on **Finder**
- ◆ Select **Applications**
- ◆ Select **Cisco** Folder
- ◆ Click on **Uninstall AnyConnect**

- ◆ Select **Uninstall**

- ◆ Type computer **Username** and **Password**
- ◆ Click "**Allow**"

- ◆ Click **Quit**

The AnyConnect program is now uninstalled from your MacBook Pro.
