Rezoning for Lucille J. Bradley Elementary, Flex 18, and Grand Oaks High School

OCTOBER 18, 2016
Why are we looking at rezoning the attendance boundaries?

We will be opening a new 1,000 student elementary school in August of 2017. Lucille J. Bradley Elementary will serve grades K-4 and be located at 4200 Falls Lake Drive.

We will be opening a new 1,000 student intermediate campus in August of 2018. Flex 18 will serve grades 5 and 6 and be located at Woodson’s Reserve Parkway and Trench Lane.

In August of 2018, we will also open Grand Oaks High School at 4800 Riley Fuzzel, which will accommodate roughly 3,000 students. The campus will open with grades 9 and 10 (current 7th and 8th graders) and phase in a grade level each year until serving grades 9-12 in August of 2020.

Zoning Goals

The following goals are used as a guide during the district’s zoning process:

• To always be mindful that providing for the education and welfare of all students is our mission.

• To draw attendance boundaries which support the efficient and effective use of school facilities and resources, while maintaining our fiscal responsibility to the public.

• To plan and allow for future growth through zoning of the existing and new campuses.

• To reduce the enrollment at overcrowded campuses.

• To communicate information about possible zoning changes to families that may be impacted and to give everyone an opportunity to provide feedback through community meeting, the district website, and in writing.

• To establish an ABC that will develop proposed attendance boundary scenarios, will present the scenarios for input at community meetings, and will develop a recommended zoning plan for the Board of Trustees.
Zoning Considerations

Many considerations are given during the process. Possible considerations for the ABC include:

- capacity of campuses;
- community input;
- demographic factors;
- feeder pattern;
- geographical proximity;
- location of existing neighborhoods and communities;
- locations of natural or other boundaries such as major thoroughfares, freeways, railroad tracks, bodies of water, etc.;
- minimizing the impact on families;
- number of times the area has been recently rezoned or likely be rezoned in the future;
- possible location of future schools;
- projected future enrollment for campuses; and,
- transportation patterns and considerations such as walking, busing, etc.
