

Instructional Technology and Library Services

Instructional Technology promotes using technology effectively for assessing student learning, differentiating instruction, and providing relevant and engaging learning experiences for all students. Professional development opportunities are provided to build the capacity of teachers and administrators to fully integrate technology into the instructional process. Library services promotes a library environment where all members of the school community can access information and technology that connects learning to real-world events. By providing access to an array of professional development opportunities, school librarians gain valuable knowledge of current trends that model, promote, and foster inquiry learning. In addition to the professional learning opportunities offered throughout the year, instructional technology remains committed to meeting the needs of teachers and campuses through designing professional learning opportunities on campus. Campus trainings are tailored to meet the specific needs of teachers on those campuses.

Instructional Technology and Library Services

List of Staff Developments Offered:

- Arc Video and Audio Communication Tool
- Beyond the Video: Using Video Instruction to Enhance Learning
- Building Student Choice in the Elementary Classroom
- Building Student Choice in the Intermediate and Junior High Classroom
