Janet –

Please pass this over to the lady @ Conroe HS.

Network Accounting will not work for them ... they need to select Xerox Standard Accounting.

Hasn't changed. They don't want to use Network Accounting, that's for a 3rd-party accounting software like PaperCut or Workplace Suite. They should be using Xerox Standard Accounting as the Accounting Method. I think George Cunningham has a guide.

Thank you,

rs

Rob –

Looking for some help please. Has User Code set up changed on the B8055's? Read customer's comments below:

I am having problems using the Accounting Codes on our B8055 MFP, that I have set up. Do you have someone experienced at this, that can help me?

I have tried Network (local) Accounting but I get an error saying login is ok, but password must be changed, call System Admin or key in IP address to change, so I change the password, but it still get same error message.

I liked Xerox Standard because they didn't have to have a password, But I had issues with it also.
