4 Year Projected Fleet Costs - 6\% Inflation

## Key Takeaways

- Almost $35 \%$ (198 Buses) of our bus fleet is currently 16 plus years old or older. The industry standard for the life of a school bus is 12-15 years.
- Approaching two-thirds of our bus fleet will be beyond the upper end of life expectancy in the next four years
- Purchase of used buses has allowed the District to provide air-conditioned buses for routes and field trips. However, many of those buses will move into the 16+ year category in the next few years.
- Current fleet average age is 12.38 years.
- Even with the 58 buses currently on order (due between now and Jan 2024), we will still have 140 buses in the fleet that are currently $16+$ years old.
