

College Readiness

College Readiness supports students with the necessary knowledge, skills, and attitudes needed to achieve post-secondary academic and career success. Our 2023-2024 focus will be on the transition to digital PSAT and SAT for campuses and students. AP subject area collaborations will be offered in September and January leading up to our annual AP Conference. As CCMR criteria change, campuses will receive updates and find advanced learning opportunities to assist them. College Readiness continues to facilitate individual high school campuses as they meet the unique college & career readiness needs of their students, including first-generation, economically disadvantaged, at-risk, African-American, and Hispanic students. CISD College Readiness continues to expand its mission with a close collaboration with Guidance & Counseling in developing professional development within the Texas Effective Advising Framework.

List of Staff Professional Learning Offered:
